

Aerovox Corp.®

For Immediate Release

New

June 26, 2006

Aerovox Corp. announces the new “ZeMax” standard line of capacitors made on a fully automated assembly line that will effectively compete with the low cost, hand assembled products currently being offered outside North America.

The “ZeMax” capacitor design utilizes an aluminum case and steel cover. It is available with a variety of terminations for lighting and motor run applications. The capacitors are fully impregnated with an environmentally “green” fluid for excellent performance and life. Capacitor designs are cULus recognized components with a fault current rating of 10,000 amps AFC.

Round cases are available in 1.75” and 2.00” diameters with voltage ratings from 330 Vac to 660 Vac, and capacitance range of 15 μ F to 80 μ F.
